EXPERIENCE

Musician/Sound Engineer

2008 - Present

- Besides performing, my responsibilities were managing various audio interfaces, digital audio workstations, and instruments.
- Scheduled practice meetings for three groups, and instructed members from each band in all aspects of vocals and instrument ability.

RJK Construction/Skilled labor

2017 - 2018

- Provided skilled labor services for dozens of clients in Southwest Missouri, including projects valued over two million dollars.
- Served as senior member with responsibilities such as lead trainer, instructing over five co-workers in construction methods, job functions, and OSHA standards.

EDUCATION

University of Kansas Coding Boot Camp/Full-Stack Web Development

2019 - Feb 2020

- Individual assignments were required on a weekly basis, and group projects were every other month. Teamwork was a must to succeed, I also was in charge of scheduling meetings for my teams, and leading when needed.
- Configured and set up multiple hosting sites, databases, middleware, and routing for development and production branches.

CLASS PROJECTS

InvestmentPal - A Full-Stack informational website

- Technologies used: React, JWT, Express, Node.js, and MySQL.
- An App that has current investing information.
- Functionality to create an account and make posts about the stocks in your live feed. [InvestmentPal](#)
